Follow these three steps to install the ECL IDE (Windows only*)

1. Download the installer ECL IDE v8.10.10: <u>https://d2wulyp08c6njk.cloudfront.net/releases/CE-</u> <u>Candidate-8.10.10/bin/ide/hpccsystems-eclide-community_8.10.10-1Windows-i386.exe</u>

2. Once downloaded, execute the installer and accept all the recommended settings. Once completed, click the "Finish" button, as shown in the images below:

🕞 ECL IDE Setup	×	🕞 ECL IDE Setup	X	
	Welcome to ECL IDE Setup		Completing ECL IDE Setup	
	Setup will guide you through the installation of ECL IDE.		ECL IDE has been installed on your computer.	
	It is recommended that you close all other applications before starting Setup. This will make it possible to update relevant system files without having to reboot your computer.	Click Finish to close Setup.		
	Click Next to continue.			
R	Click "Next" and accept all default settings		Once completed, click "Finish" to close the installer	
	Next > Cancel		< Back Finish Cancel	

3. In the Windows start menu, navigate to "HPCC Systems > ECL IDE" and by clicking in this option verify if the software initializes, as shown in the images below (click "Cancel" to close the software):

Done! You are all set with your PC to start the workshop!

* If you are not planning to use a Windows PC during the workshop, the recommendation is to use VSCode with the ECL extension as described <u>here</u>.
